Equipment

Sangean ATS 909 W (110/110 kHz Filter)

Blaupunkt Woodstock DAB 53

Datum: 05.01.2013

Ständig empfangbare Sender: 99

Scatter: 0

Gesamt: 99

Standorte

Bihać (Stadtzentrum), Put 5. Korpusa

Anmerkungen zum Bandscan

Der Bandscan dient als Übersicht über die Empfangslage in Bihać, im Stadtzentrum auf durchschnittlicher Seehöhe.

Es wurde aus Zeitgründen nur mit dem Autoradio Blaupunkt Woodstock DAB 53 gescannt (Sangean ATS 909 W für PI-Codes), sicherlich ist mit höherem Equipment noch viel mehr herauszuholen. Dies war aber in diesem Fall nicht beabsichtigt.

Interessant ist, dass zahlreiche Sender aus dem Bereich Nordwest bis Nordost empfangbar sind, jedoch allesamt mit schwachen Pegeln. Dies ist einerseits auf die Tallage der Stadt zurückzuführen, andererseits auf Reflexionen an den hohen Bergen im Westen und Süden.

Farberklärung:

O=5	5
O=4	4
